DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 12, 19, 24, the prior art and Mlinarsky et al (US Patent No 6724730 B1) and Shimazaki et al (US Patent No 6959250 B1) and Hassoun (US Patent No 5838949) either alone or in combination failed to teach a system for multi-path simulation comprising: a signal-simulating unit coupled to the signal generator for dividing and adjusting the signal into N simulation signals in N ways to simulate attenuations and delays resulted from a transmission of the signal in N paths, wherein N is an integer larger than one; and a shielded anechoic chamber comprising N antennas which are coupled to the signal-simulating unit and used to transmit the N simulation signals respectively. Furthermore, the prior art failed to teach the features of measuring a signal parameter received by the communication device to acquire a reference value; switching the communication device to the antenna diversity mode and attenuating the testing signal by a second attenuation setting to adjust the signal parameter equal to the reference value; and calculating a difference between the first and second attenuation settings to obtain the diversity gain of the communication device.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
